

HARISH S U

Cybersecurity Fresher | SOC & VAPT Aspirant

Vellore, Tamil Nadu | +91-8778271624 | harishumachandran@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity fresher with practical, lab-based experience in SOC operations, SIEM-based threat detection, and VAPT fundamentals, built through a 6-month offensive security training program and independent projects. Comfortable using Splunk and Wazuh for log analysis and incident investigation, and experienced in identifying brute-force attacks, RDP anomalies, and privilege escalation patterns using Windows Event Logs and Sysmon. Trained hands-on with MITRE ATT&CK-mapped attack techniques and tools including Nmap, Metasploit, and Burp Suite, with working knowledge of Python and Bash for scripting and automation. Completed the Deloitte Australia Cybersecurity Job Simulation (Forage); currently pursuing CEH certification.

TECHNICAL SKILLS

SIEM & SOC Tools: Splunk, Sysmon, ELK Stack (basic)

SOC Operations: Threat Detection, Log Analysis, Incident Investigation, Alert Triage, Event Correlation, Threat Hunting, MITRE ATT&CK Framework

VAPT / Pen Testing: Nmap, Wireshark, Metasploit, Hydra, Burp Suite, Vulnerability Assessment, Reconnaissance, Exploitation Basics

Attack Detection: Brute Force, RDP Monitoring, Privilege Escalation, PowerShell Attack Detection, Credential Access

Operating Systems: Kali Linux, Ubuntu, Windows Server/Client, Windows Event Logs

Networking: TCP/IP, Firewall Basics, Packet Analysis, Network Monitoring, IDS/IPS

Scripting & Dev: Python, Bash, PowerShell, SQL, React (basic)

Cloud & Virtualization: AWS (basic), VMware, VirtualBox

TRAINING & PROFESSIONAL DEVELOPMENT

Red Team Training Program - Red Team Hacker Academy

Jan 2026 – Jun 2026 | Bengaluru (Offline)

- Completed an intensive 6-month red team training program covering offensive security techniques, penetration testing methodologies, and adversary simulation across network, web application, and Active Directory environments.
- Practiced real-world attack scenarios in lab environments, developing skills in privilege escalation, lateral movement, and evasion techniques mapped to MITRE ATT&CK.
- Gained hands-on experience with Metasploit, Burp Suite, Nmap and custom Python exploit scripts.

PROJECTS

SIEM-Based Threat Detection Platform ([GitHub](#))

Splunk · Sysmon · Windows Event Logs

- Built a centralized SOC monitoring lab using Splunk and Sysmon, ingesting 5,000+ simulated Windows event logs, with 10+ custom dashboards and alert rules to surface brute-force attempts, RDP anomalies, and privilege escalation events.
- Mapped 15+ detection rules to MITRE ATT&CK tactics (Credential Access, Lateral Movement, Persistence) for framework-aligned incident response practice.

ThreatScan: AI-Powered Email & URL Threat Analyzer ([GitHub](#))

React · Claude AI · Chrome Extension

- Built a Chrome Extension for Gmail that scans emails and embedded URLs for phishing indicators using the Claude AI API for NLP-based content analysis.
- Assigns a 0–100 safety score per email to flag suspicious content, tested against 100+ sample emails covering phishing, spoofing, and malicious-link scenarios.
- Designed a one-click side-panel UI to scan unread messages without manual copy-paste, cutting per-email review effort compared to manual inspection.

Sign-to-Speech: Real-Time Gesture Recognition & Voice Generation ([GitHub](#))

MobileNetV2 · MediaPipe · Python

- Built a real-time hand gesture recognition system converting 20+ ASL gestures into synthesized speech using MobileNetV2 and MediaPipe.
- Achieved high recognition accuracy on a self-collected test dataset, with low-latency inference suitable for real-time use on standard webcam hardware.
- Built an accessible Tkinter UI with emergency email alert functionality for critical gestures, aimed at supporting users with speech and hearing disabilities.

EDUCATION

Master of Computer Applications (MCA) - CGPA 7.83/10

Vellore Institute of Technology | Apr 2025

Bachelor of Computer Applications (BCA) - CGPA 7.5/10

KMG College of Arts and Science | May 2023

CERTIFICATIONS

- Certified Ethical Hacker (CEH) - EC-Council (In Progress)
- Deloitte Australia Cyber Job Simulation (Forage) - May 2025
- Git Training Certification - Simplilearn, May 2025
